

CAYMAN CAREER GUIDE

OPPORTUNITIES IN THE CAYMAN ISLANDS

**A Special Advertorial Section of
*Grand Cayman Magazine***

Charting the Future

By Hon. Rolston Anglin, JP

Education is the key to charting the future, both personally and professionally. For Cayman's youth, it is the path that leads to a rewarding and successful career as well as a fulfilling personal life.

In short, education opens doors.

As Deputy Premier and Minister of Education, Financial Services & Employment, I encourage young people to explore the many options available in the Cayman Islands, whether it's on-the-job training, tertiary education, community college, or vocational school.

If we are to compete in today's global economy, we need to attain the skills to do so. I challenge young people to strive to become the leaders of tomorrow and to take this role seriously. As the agents of change in our community and our country, you are the key players in shaping the future.

Cayman's future workforce must be able to lead and innovate in our sophisticated financial services and tourism products and be prepared to take advantage of new opportunities that are on the horizon. The development of Health City Cayman Islands means a wealth of choices in the healthcare field. Cayman Enterprise City is drawing new and exciting businesses to these shores, creating highly skilled jobs within this special economic zone. I encourage youth to explore the career options these industries present, and the skills needed for success in them.

Employers know the value of sourcing workers locally, and many are willing to assist with training, education, and work experience.

Many industries today demand post-graduate educational qualifications. It can mean a significant financial investment. Assistance is available through scholarship and education programs offered in both the private and public sectors. The government provides a variety of scholarships for Caymanians to attend local and overseas tertiary institutions.

Many firms in the financial services field offer significant scholarships to promising young Caymanians as well as mentorship to assist employees to grow and advance within the workplace.

There are other community resources. Junior Achievement, for example, offers young people a chance to explore their potential while gaining valuable business skills. The government-sponsored Passport2Success program assists recent high school graduates and Caymanian school leavers who have not yet found suitable employment to update and upgrade their skills and begin a new career direction.

Employers know the value of sourcing workers locally, and many are willing to assist with training, education, and work experience. Tap into those resources.

Young people must start now to position themselves for success in the workplace – and in life. With Cayman poised for growth and new opportunities, the prospects are better than ever to chart your own course to a meaningful career path. ❖

Cayman Set for Growth, New Career Opportunities

WITH CAYMAN'S BUSINESS SECTOR
POISED FOR GROWTH AND DIVER-
SIFICATION, YOUNG PEOPLE HAVE
MORE OPPORTUNITIES THAN EVER TO PREPARE FOR
SUCCESS IN THEIR NEXT STAGE IN LIFE.

Whether a school leaver, college graduate, apprentice, or novice young professional, there is a world of opportunity opening up in the Cayman Islands in a diverse cross-section of trades and industries. With new businesses and major projects coming on stream, it means new opportunities in careers, education, and training.

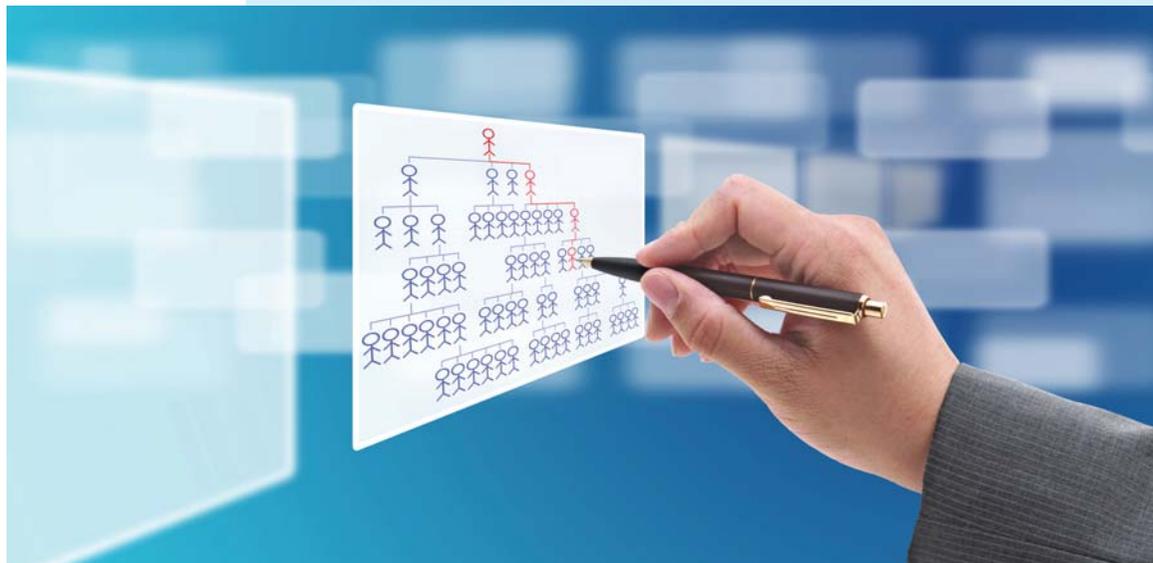

And there's no better time than now to start planning for a rewarding career and future. With work permit fees skyrocketing, more employers will be seeking local talent – and many proactive firms on island provide assistance with training, tuition, education and on-the-job experience.

Financial services and tourism are Cayman's two main economic engines, and numerous players in these industries have introduced strategies to attract Caymanians in an effort to reduce dependence on foreign workers. A number of companies in the financial services field offer significant financial assistance to promising young Caymanians as well as guidance and mentorship to assist employees to advance and develop within the firm. Ernst & Young, for example, offers scholarships, training, and employment opportunities to promising young Caymanians eager to pursue a career in accounting.

A new economic pillar is about to emerge as plans for the new Health City Cayman Islands go forward, opening up vast educational and career opportunities in the health-care field. Positions for doctors, nurses, support staff, and technical workers will be in demand as the first phase opens in early 2014. Complementing this major undertaking is a new four-year nursing degree program being offered at the University College of the Cayman Islands, a joint venture between UCCI and the government ministries of health and education.

Health City Cayman Islands, spearheaded by renowned cardiac surgeon Dr. Devi Shetty, is being built in phases over 15 years, and will include a tertiary-care hospital, an educational facility, biotech park and an assisted living community. Once complete, the hospital will house 2,000 beds and employ thousands of persons at its East End site.

Cayman Enterprise City (CEC) is already attracting new business, investment, and employment to these shores. This knowledge-based special economic zone will create highly skilled jobs, and bring in new industry and opportunity, and establish another economic pillar.

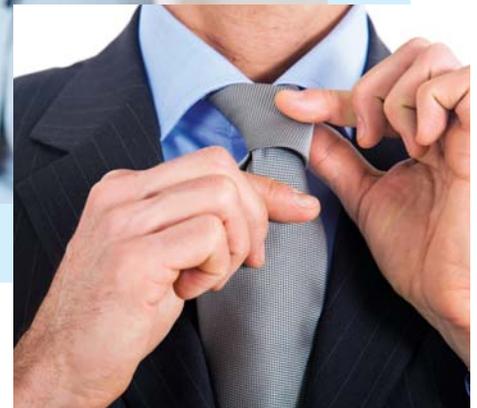

CEC will focus on six main sectors: internet and technology, media, biotechnology, commodities and derivatives, academics, and outsourcing. It is currently operating in office space in George Town, and once enough tenants sign up, a campus will be built in Savannah.

Since its launch in February 2012, CEC has signed 43 international companies, with another 130 prospects in the pipeline. Many are in the internet and technology sectors, as well as a number in the commodities and derivatives and media sectors.

Plotting Your Path

There are many community and government resources to help guide young people in making smart career choices, as well as gain the skills and knowledge needed to enjoy success in their chosen field.

The Cayman Islands Chamber of Commerce is a good place to start. A long-time champion of developing youth and Caymanian talent, the organization has just launched a website – www.showmethemoney.ky – that is designed to assist career and job seekers. The site lists scholarships available locally in both the private and public sectors, and also features job postings. It includes a comprehensive online career guide that offers advice on everything from

With new businesses and major projects coming on stream, it means new opportunities in careers, education, and training.

resume writing and field research to job search techniques and the interview process.

Each year, the Chamber hosts a Careers, Education, Training & Jobs Expo where representatives from industry sectors, associations, government agencies and private sector companies promote their training and education programs, as well as any vacancies they may have available. This year's expo takes place in early February at UCCI.

The Chamber is a big supporter of Junior Achievement, a program launched by the Rotary Club of Grand Cayman in the early 1990s. It offers young people opportunities to explore their potential while gaining valuable business skills as they learn how to start and operate a company. Professionals in the business community volunteer to assist the students.

The Passport2Success program assists recent high school graduates and Caymanian school leavers who have not yet found suitable employment to update and upgrade their skills, and begin a new direction. An initiative of the Ministry of Education, Training and Employment, with support from the private sector, the program runs four

times a year and is open to Caymanians ages 17 to 20. Launched more than three years ago, the work training initiative has enjoyed success, a venture co-sponsored by CML Offshore

Recruitment, Butterfield Group and LIME.

Deloitte Cayman recently announced the launch of the Deloitte Employability Initiative, a program designed to help high school students develop personal skills, attitudes and behaviors needed to succeed in the workplace. The program is being run in partnership with the Cayman Islands Further Education Centre, located at the old John Gray campus on Walkers Road. The education center offers a variety of classes and programs, including work experience, job placements, and courses in such vocational options as art and design, cosmetology, health, and hospitality. The aim of the center is to ensure young people have the opportunity to maximize their potential, and develop as responsible and active citizens.

With so many choices out there, it's important to tap into available resources to assist in making the right ones when it comes to charting the future. And Cayman's corporations, businesses, educational facilities, and organizations are all there to help – they know just how important it is to support the development of the country's future business and community leaders and innovators. ❖

Growing with Dart as Dart Grows with Cayman

The Dart Group of Companies is not only helping to shape the island's economic future with its diverse range of commercial and residential projects but is creating a myriad of opportunities when it comes to young people seeking meaningful employment and exceptional careers.

Dart's diverse portfolio of companies encompasses a cross-section of industries, spanning from real estate development, finance, and technology to retail businesses, project management, and construction services. While based in the Cayman Islands, Dart Enterprises has a global reach with significant investments around the world.

Dart is setting a new standard for real estate development in Grand Cayman with the Town of Camana Bay, a one-of-a-kind master-planned community being developed over several decades.

With this growing community, combined with Dart's portfolio of companies, comes a thriving workforce, and blossoming opportunities. Dart currently employs more than 600 people locally, with more than 60 per cent of the workforce comprised of Caymanian/Permanent Resident employees and the remainder made up of expatriate workers from many countries across the world.

Dart places a premium on recruiting and developing quality personnel to grow with this close-knit family business. It strives to hire the most suitably qualified candidates, with an emphasis on selecting and developing quality local talent. A key consideration in its comprehensive recruitment process for candidates is a fit with Dart's core values, culture, and philosophy. The company seeks candidates who demonstrate dedication and industriousness, honesty and integrity, innovation, reasoning and logic, teamwork and respect, as well as profit motivation.

Dart also invests in its people through continued education and employee development. That includes

a commitment to provide up to 40 hours annually of training per employee, with both local and overseas opportunities. Its dedicated training resources include a Training and Development Manager and a Training and Resource Centre as well as an educational assistance program for those seeking to advance their skills and knowledge. Its Personalized Development Plan encourages individual growth, equipping employees to take an active role in their career development and direction. The Dart

Dart places a premium on recruiting and developing quality personnel to grow with this close-knit family business.

Management Accreditation Program covers a range of courses in management practices, communication, business writing, coaching, and conflict resolution.

To help young people reach their full potential, Dart invests in a variety of scholarship programs, internships, grants, mentoring, and sponsorships. It established an Award of Excellence to recognize the top academic achiever at Cayman International School and, through its private foundation, supports numerous youth education programs. Many of these focus on fostering excellence in math and science, as Dart believes these disciplines are the foundation of academic and career success. Among them is Minds Inspired, a high school scholarship, which aims to increase the quantity and quality of Caymanians pursuing math and science-related careers.

The organization also offers a summer work experience program where students gain practical skills and knowledge through their on-the-job work experience. The key goal behind all of

its programs is to foster excellence and encourage young people to reach their full potential – contributing, well-rounded employees and citizens.

Dart's commitment to getting talented young Caymanians in the door and retaining them is especially critical at a time when the youth unemployment rate is the highest out of any age group in the country. Caymanians aged 30 and under now make up almost a quarter of the workforce across Dart's core companies.

Diversity is a central characteristic of the Dart Cayman organization, and its workforce reflects that. Presently, Dart employs professionals and practitioners in a broad spectrum of disciplines, some that are rather unique to the island.

Jeffrey Wight, for example, serves as Manager of Sport and Recreation at Camana Bay. His duties, among others, include overseeing the operation of the Camana Bay Aquatic Club.

Andy Adapa is the Senior Manager for Landscape Services at Dart Realty – overseeing Camana Bay's "living landscape," an element as important as the town's architecture.

Alexandria Whittaker is a Marketing and Events Coordinator at Dart Realty, assisting with Camana Bay's whirlwind calendar of events and activities. The 24-year-old started with Dart in 2011 as a new graduate, and was transferred to her current position after a year on the job learning new skills with Dart Enterprises' Corporate Communications.

And this is just a small sampling of the diverse, and rewarding, jobs and careers blossoming within the Dart Group of Companies, where the potential to learn, advance and chart your own course has seemingly limitless possibilities.

For more information about Dart in the Cayman Islands, go to www.dartenterprises.biz. ❖

DART GROUP OF COMPANIES

MEET FOUR CAYMANIANS BUILDING THEIR CAREERS AT DART

Caymanians are successfully making the move from their studies into full-time employment across the Dart group of companies. Meet a handful of our talent:

ALYSON HAY, Communications Coordinator

When Alyson Hay graduated in May 2012 with a Bachelors degree in marketing with a minor in writing, she never imagined just a few weeks later she would be offered a full-time job in her chosen profession as the new Communications Coordinator for Dart Enterprises Ltd.

"I love to craft words together," she said. "With my job I love how no two days are the same – there is always something new to write about." Alyson also coordinates all donation/sponsorship requests for Dart's Philanthropic Giving Committee. "This allows me to be at the forefront of the needs in our community and know about different volunteer opportunities. I sometimes take advantage of these opportunities to give back because I find satisfaction in helping others, and if I can do it while working – that's a win-win!"

Alyson offers these thoughts to young people about to transition from university to their first job: "Don't stick your nose up at entry level positions. Having a degree does not guarantee you a certain position or salary range. Entry level positions can test your ability and interest for your chosen career. By working from the bottom up, you will understand what it really takes."

COLLEEN CUMMINGS, Property Manager

When Colleen Cummings returned to Cayman from university in 2009 with a degree in Hospitality and an MBA in hand, she visited Camana Bay for the first time and "fell in love with the concept of modern urbanism. I wanted to be a part of such a new and exciting development."

Colleen is currently a Property Manager with DRCL Property Management, where she is responsible for Regatta Office Park, a 127,000 square foot office space, and the Yacht Club, where she provides direction and supervision to a staff of four.

"I've found my niche in Property Management, which is a growing market with many avenues to specialize in – from commercial buildings to hospitals to residential communities, and the list goes on!"

BRENTON RANKIN, Project Manager

When Brenton Rankin came home to Cayman in 2009, "Dart was all people were talking about – like how the company was doing things for the community by providing jobs and career opportunities for locals and foreigners alike."

"I also had the pleasure of meeting a few people that worked in various departments in the company, and everyone had nothing but good things to say. The final selling point was the sense of belonging to a family-type organization, rather than just working for some big company."

"The thing I love most about my job," he says, "is watching a project go from an idea, to a concept, into planning, then into construction, and finally watching people enjoy the finished product – whether it be a retail shop, restaurant, or new office building."

Brenton's advice to someone still in university contemplating career choices: "Pursue something you are passionate about. As the saying goes, 'Find something you love to do, and you will never have to work a day in your life!'"

KARIE BOUNDS, Cultural Programme Coordinator

The opportunity to join a dynamic organization that promotes arts and culture was highly appealing to Karie Bounds.

"I took a special interest in Dart as an organization, and in particular the development of Camana Bay, as it saw value in adding cultural elements to the Town Centre, both aesthetically and through community events and activities."

As Cultural Programme Coordinator, Karie plans, coordinates, and implements a variety of arts activities and cultural events in the Camana Bay Town Centre. "I enjoy coordinating events that engage the community and facilitate creativity. This job allows me to utilize my knowledge of Cayman and what makes our destination unique. My events, therefore, celebrate Cayman and showcase the diverse people, arts, history, and foods that exist here."

A Great Place to Begin – And Build – a Career

Ernst & Young LLP has long been recognized as one of the world's leading employers and recently was selected for *FORTUNE* magazine's "100 Best Companies to Work For" list for the 15th consecutive year.

It's an honor, and one that supports Ernst & Young's belief that its continued success lies in its people. The professional services firm has long put a premium on recruiting high-caliber talent to its fold, offering employees numerous opportunities to develop, achieve, and grow.

Its Cayman Islands office is no exception. Located in Camana Bay, the firm encourages Caymanian students to pursue a meaningful career in the financial services field, and reach their full potential. Among its incentives to attract the best and the brightest: full scholarships for students to continue their education, internships, assistance with professional qualifications, and mentoring. Once in a full-time position, there are vast opportunities for growth and advancement.

"Ernst & Young is built on a foundation of integrity and excellence, and that is why we place such importance on attracting and promoting exceptional talent," says Regional Managing Partner Dan Scott. "Our tagline is 'Quality in Everything We Do.' We believe that is the hallmark of success."

To encourage and reward excellence, the firm established the "Ernst & Young Achievement Award for Academic Excellence," which recognizes the highest achievers in the graduating classes of all high schools in Grand Cayman and Cayman Brac. Recipients are presented an award as well as a financial contribution toward their education.

Ernst & Young also awards a prestigious annual scholarship to a student

Regional Managing Partner Dan Scott

"Ernst & Young is built on a foundation of integrity and excellence, and that is why we place such importance on attracting and promoting exceptional talent."

in each of its Cayman Islands, Bahamas, Bermuda, and British Virgin Island locations. The program offers participants financial support toward their degree as well as the opportunity to gain practical experience as an intern within the region for an eight-to-ten week period during summer breaks. The scholarship is valued at up to \$30,000 per calendar year and is renewable for up to a maximum of five years until the recipient has completed the minimum educational requirements necessary to qualify for the Certified Public Accountancy or Chartered Accountancy professional licensure.

To attract new talent and introduce Ernst & Young as a great place to start and build a career, the firm takes part in a variety of outreach and education programs. Leaders, for example, visit local schools and post-secondary institutions to speak about the accounting and professional services industry and the vast opportunities they offer. The firm also takes part in a variety of job fairs, hosts informational social events in the community, and works with career counselors in local schools.

Ongoing Education

Ongoing education and professional development are priorities at Ernst & Young. Its comprehensive development program provides ample opportunity and support to help new employees map their own career paths. There are three key components to the program: learning, experiences and coaching.

Its global learning curriculum has two parts. The first is designed to build general business skills and acumen. The second is aimed at constantly refreshing and enhancing technical skills to improve service and forge better client relationships. Ernst & Young offers more than 16,000 courses on its learning management system. Much of it is web-based and can be tailored to suit both practical needs and the employee's desired career direction.

The firm also offers opportunities to experience working globally on both a short-term and long-term basis, and encourages employees to use their professional skills to give back to the community.

On-the-job coaching is a hands-on approach that provides opportunities for those starting out to work closely with staff members at all levels for input, sup-

RISING STARS

port, and feedback on job performance and career development.

The firm has an extensive orientation program to ensure new recruits feel at home from the start, including pairing with a “peer advisor” within the organization to provide support and assistance.

There are a number of criteria the firm looks for in its employees as part of the hiring decision. They include high academic achievement, leadership potential, community involvement, communication skills, and teamwork abilities. Integrity, respect, enthusiasm, ambition, and a commitment to quality are among the firm’s core values and beliefs.

“Our goal at Ernst & Young is to equip our employees with the skills, knowledge, and confidence they need to take ownership of their careers,” says Mr. Scott. “That development is at the heart of our culture. We believe employees do their best work when they have the freedom to chart their own course. And, ultimately, that means our clients will benefit, too.”

Ernst & Young has been a leader in promoting and recruiting the best and the brightest students in Cayman for 35 years, helping Caymanians climb the ladder of success.

The typical career progression for a new employee with a university degree is to start as a staff accountant and then advance to senior, manager, senior manager, and then on to executive director or partner. Primarily an audit firm, Ernst & Young also has advisory, tax, and transactions practices, and as well offers career opportunities in finance, human resources, info tech, and administrative work.

For a young person starting out – or a seasoned professional seeking to make a change – Ernst & Young offers an outstanding work environment and an attractive path for growth and advancement. Aspiring – and inspired – applicants are always welcome. ❖

ERNST & YOUNG LTD.
345.949.8444 | ey.com

While the path to becoming a qualified accountant can be challenging, the rewards are many. Five rising young Caymanians at Ernst & Young recently achieved that career milestone by earning their CPA designations. They, along with other recent graduates, were honored at a gala evening sponsored by the Cayman Islands Society of Professional Accountants (CISPA). All five demonstrate the effort and dedication it takes in pursuing – and achieving – excellence.

Christy Gaus, a recent graduate, credits her mother, a CPA herself, for encouraging her to pursue a career in accounting. Christy interned at Ernst & Young for two summers, an experience that confirmed her aspiration to become a CPA. With the assistance of an Ernst & Young scholarship, she completed her Masters of Accounting and MBA degrees at Florida Atlantic University and Palm Beach Atlantic University respectively last year.

Stuart Gorter comes from a family of accountants and knew early on that he wanted to continue that family tradition. He recognized that earning his CPA was necessary to reap fully the benefits of a career in accounting.

Stuart graduated from Emory University in 2011 with a Bachelor’s of Business Administration Degree and joined the firm soon after as a Staff Accountant.

Melanie McTaggart is another bright star at Ernst & Young. She received an Ernst & Young “Achievement Award for Academic Excellence” in high school and also received an E&Y scholarship to assist throughout her education at the Wharton School of Business and the University of Texas. She also completed an internship and one year of fulltime employment with Ernst & Young in New York before joining the Cayman practice in 2012.

Shanna Ruiz was introduced to accounting by her big sister, Allison. Shanna was in middle school while Allison was studying accounting at university.

Shanna studied basic accounting in high school, and with the help of an Ernst & Young scholarship, went on to earn her Bachelor’s in Accounting from the University of Tampa, graduating with honors.

Angela Whittaker joined Ernst & Young in 2006 as a Client Services Associate, moving into the audit division a year later. Her outstanding work and winning attitude earned her an Ernst & Young scholarship. She attended Pace University in New York City. After graduating with honors with a combined BBA/MBA degree in accounting, she went on to pursue her CPA.

Earning this designation has been one of Angela’s life goals, and she says Ernst & Young’s support and encouragement inspired her to challenge herself and fulfill her potential.

Rewarding Careers in Healthcare

It's a groundbreaking project that will open doors to new and diverse career and job opportunities in the healthcare field – and beyond.

Health City Cayman Islands will not only boost the economic health of the Cayman Islands but also the health of its citizens. It will create hundreds of good jobs, and unprecedented opportunities in research, training, and education.

For young Caymanians exploring their next step in life, Health City Cayman Islands will open up dynamic new options for a meaningful, rewarding, and enriching career path. Positions for doctors, nurses, and medical support staff will be in demand as the first phase of the multi-specialty hospital opens in early 2014 – and the demand will keep growing as more beds and specialized services come on stream.

Health City Cayman Islands will not only open up options for those starting out in their professional life but also bring opportunities for the population as a whole, both Caymanians and expatriates. The facility will eventually employ hundreds of healthcare professionals and support staff, and create significant employment in the construction field as well as in a variety of services necessary to support a major medical campus.

It means new prospects for local residents, and significant investment to the Cayman Islands.

Medical tourism is one of the fastest growing segments in the healthcare industry.

Health City Cayman Islands is the vision of renowned Indian philanthropist and cardiac surgeon Dr. Devi Shetty, who pioneered a new model of healthcare delivery. Dr. Shetty and his team originated the concept of a “Health City,” a 2,000 to 5,000-bed conglomeration of multiple super-specialty hospitals in a single campus. The economies of scale achieved through the health cities enable the group to provide affordable quality healthcare to thousands.

The Cayman campus is being modeled after these successful high-quality, high-volume, low-cost hospitals. The project will bring superb quality, affordable healthcare services to the Cayman Islands, as well as create a world-class destination for medical tourism.

Medical tourism is one of the fastest growing segments in the healthcare industry. Patients are increasingly traveling outside their own countries to receive medical and surgical care, mainly due to affordability, accessibility, and, importantly, often a higher level of care.

The medical complex will largely target tertiary-care patients from North

and South America as well as the Caribbean region.

Phase one of the US\$2-billion project is a joint venture between Dr. Shetty's group of hospitals and Ascension Health Alliance, the largest non-profit healthcare organization in the United States.

The project will diversify the Cayman economy—medical tourism will join financial services and hospitality as one of our major industries—bringing an enormous economic infusion to the country.

Site preparation began last fall in the High Rock site in East End. The Central Planning Authority recently approving its groundbreaking Planned Area Development applications, or PADs – the first project to submit applications under this new, streamlined process that was introduced into local planning law in 2010. PADs are for mixed-use projects encompassing more than 40 acres that are master-planned as one development.

The first PAD includes plans to build a hospital, hotel and medical and nursing schools on 50 acres of land in the High Rock area of East End. The second PAD includes an adjoining 50 acres of land to build another hotel, commercial and retail ventures, restaurants, and residential and assisted living accommodations.

The project is being developed in phases over 15 years, and will eventually include a 2,000-bed tertiary-care

CAREER OPPORTUNITIES

Applications are currently being accepted for a variety of positions when the first phase of Health City Cayman Islands becomes operational in early 2014. They include:

hospital. The multi-specialty hospital will provide services not widely available in the region such as open-heart/bypass surgery, angioplasty, heart-valve replacement, cancer treatment, bone-marrow transplant, nuclear medicine, organ transplant, and orthopedics.

Health City Cayman Islands is scheduled to welcome its first patients in January of 2014 when the first phase opens: a 140-bed tertiary-care hospital that will be a center-of-excellence in cardiac surgery, cardiology, and orthopedics.

A number of positions will be available. Within the clinical realm are posts for doctors, including specialist consultants, junior consultants and residents, as well as staff nurses and nursing assistants. Positions for allied health professionals include physiotherapists, radiographers, lab technicians, and ECG technicians. On the administration side are positions in front office, finance and accounting, and engineering and maintenance.

There are also construction positions available including in masonry, supervisory roles and equipment operators.

Down the road, other positions will open up for such professionals as occupational therapists and wellness nurses as well as careers in information technology, human resources, and marketing.

A report compiled by international consulting firm Grant Thornton projects that, once complete, Health City Cayman Islands would create more than 2,000 jobs, including positions for 90 doctors and 900 nurses and some 1,400 positions for support and technical staff. Caymanians will be invited to train for these positions at the medical university that will be part of this innovative complex. ❖

ABOUT DR. SHETTY

Dr. Devi Prasad Shetty is an Indian philanthropist and cardiac surgeon acclaimed for pioneering a new model of affordable healthcare delivery.

Dr. Shetty founded the Narayana Hrudayalaya Hospital (narayana hrudayalaya means "God's compassionate home" in Sanskrit) in 2001 in Bangalore. It is the world's largest heart hospital, offering cutting-edge heart surgery and medical services at a fraction of what it costs elsewhere in the world. Narayana Hrudayalaya has since grown into a multi-specialty complex, offering high quality medical care at low cost through economies of scale – high-volume turnover.

The Narayana Hrudayalaya health group operates a network of hospitals in India, with more than 5,000 beds. It aims to have 30,000 beds in the next five years in India as well as set up health cities in other countries, including the Cayman Islands.

Dr. Shetty was born on May 8, 1953 in the South Canara district of India, the eighth of nine children. After earning his medical degree in India, Dr. Shetty moved to London to train in cardiac surgery at Guy's Hospital London, one of the biggest and most respected heart hospitals in Europe. Six years later, in 1989, he returned to India to open and direct the B.M. Birla Heart Hospital. Two years later, with financial support from his father-in-law, he built a heart hospital in Bangalore, the first building block in what has since grown into Narayana Hrudayalaya health city.

Dr. Shetty's contribution to affordable health care has earned the one-time personal physician to Mother Teresa numerous accolades over the years including the prestigious Padma Bhushan award for his contributions to medicine, one of the highest civilian honors in India. He received the 2012 CNN-IBN "Indian of the Year" in the Public Service category – one of the biggest and most credible awards in Indian media. The Wall Street Journal has named him "the Henry Ford of Heart Surgery."
